

MY MATH ACADEMY

“My Math Academy is a pre-K through 5th grade solution designed to significantly accelerate mastery of foundational skills, build math fluency, and boost student confidence.”

WHAT IS MY MATH ACADEMY?

1

COMPLIMENTS EM2!

My Math Academy is not a stand-alone program. It is meant to compliment a core program.

2

ADDRESSES HOLES IN UNDERSTANDING

Through the use of a short placement test, students will be placed on a level that levels instruction in their proximal zone of development.

3

BUILDS FOUNDATIONAL SKILLS

Multiple efficacy studies involving thousands of diverse students.

4

MORE TIME EFFICIENT

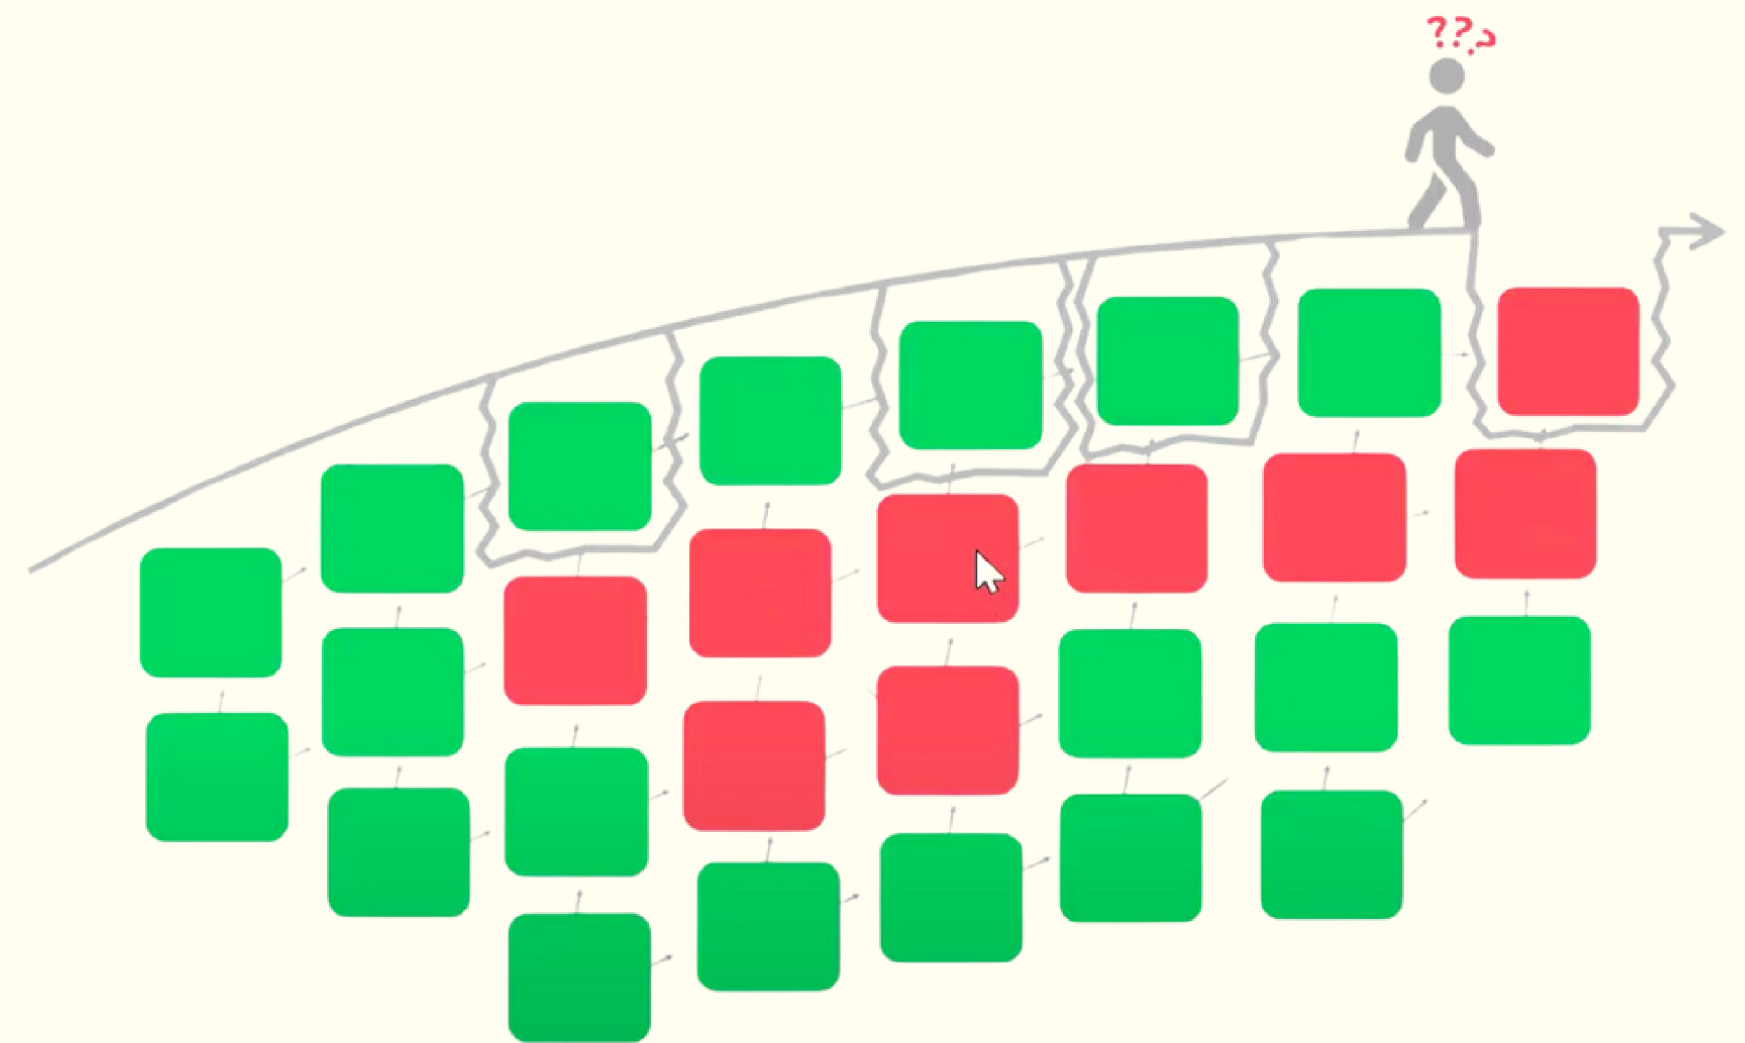

Zearn, our current companion recommends 30 minutes a day to foster results, while MMA only recommends 1 hour a week.

WHY?

Our students are demonstrating a new and deeper understanding of the math concepts they are learning using EM2!

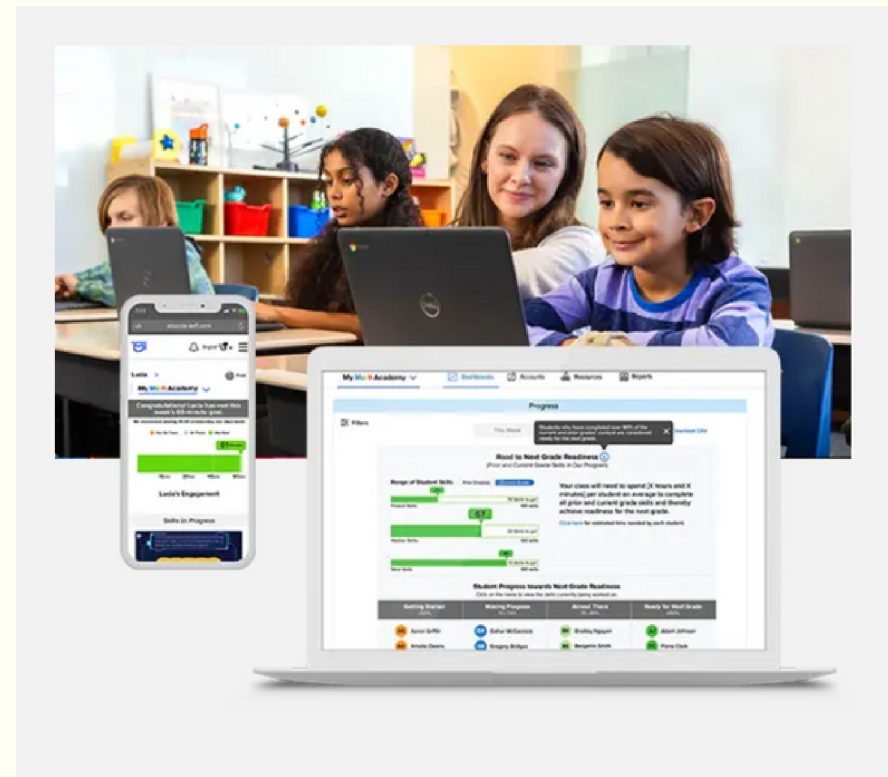

However, there are holes in understanding that have carried over, and we need to address those holes in foundational skills, so we can build a stronger foundation on which higher level skills will be taught.

Architecture of Understanding

FREE YEARLONG PILOT

- Opportunity shared with me by Jon Regino
- PD and access are free for the year
 - There is a possibility for a second free year
- Useful reports for teachers and administration
- Recommended only 1 hour a week
- Accessible at home
- Full caregiver center to strengthen home and school connection.

GAME BASED

Game- Based placement offers a unique pathway for each user.

ADAPTIVE

100 data points taken every 3–4 minutes continually adjust student path and pace towards skills proficiency.

FEEDBACK ALIGNED

MMA uses CRA methodologies which align with Eureka Math2!
