EXECUTIVE SUMMARY

Family members at RTMSD were surveyed in March 2023 about their perceptions of their school in terms of Engagement, Relationships, Culture, School Safety, Resources, and Communication and Feedback.

In order to put feedback into context, this report compares RTMSD family members' ratings to the ratings from family members at **569** other elementary schools across the country.

Compared to other participating elementary schools, RTMSD's **highest rated themes** were:

- Relationships
- Culture

and the **lowest rated themes** were:

- Resources
- Engagement

Compared to other participating elementary schools, RTMSD's **highest rated question** within the key themes was:

- *My school runs smoothly.* (which is in the Culture theme)

and the **lowest rated question** within the key themes was:

- *I feel empowered to play a meaningful role in decision-making at my school.* (which is in the Engagement theme)

This report represents feedback from **591** family members. **Based on the enrollment data provided, you had a 30% response rate.** Please refer to the Appendix section for more information about the demographics of the respondents.

DIVERSITY, EQUITY & INCLUSION (DEI)

Families at RTMSD were asked a series of question about their experiences with diversity, equity and inclusion at their schools.

The Equity Additional Topic module was developed to assess families' school experiences through the lens of diversity, inclusion and social justice. Because of the density of this module, we have broken down response distributions in three sections. The questions for this module are:

1. Adults from my school value people of different:
   ◦ Religions or faiths.
   ◦ Sexual orientations. (e.g. gay, straight, bisexual, etc.)
   ◦ Abilities. (e.g. people with disabilities)
   ◦ Gender identities. (e.g. Men, Women, Transgender, people who identify in a different way, etc.)
   ◦ Incomes. (how much money someone makes)
   ◦ Races or ethnicities.
   ◦ Countries
2. How often do you see people of diverse backgrounds:
   ◦ In artworks, posters and/or pictures?
   ◦ In publications (e.g. newsletter, newspapers, yearbooks, etc.)?
   ◦ In materials sent by the school?
   ◦ During school events (e.g. Virtual school activities, school fairs, sporting events, etc.)?
3. My school provides resources in the language(s) my family needs.
4. My school encourages families to speak out against racism.
5. My school clearly communicates how to report acts of discrimination.
6. My school puts practices in place that include families of diverse backgrounds in community conversations (e.g. state of the school, town hall, listening sessions, etc.).

Please note that not every school that has taken the YouthTruth Family Survey has chosen to participate in the Diversity, Equity & Inclusion (DEI) survey module. The charts in this section of your report include significantly smaller numbers of schools and districts than do the charts associated with items in the core survey. In order to put student feedback into context, this report compares your ratings to the ratings from students at 242 schools across the country. Please make comparisons between your school and your cohort or the YouthTruth sample with caution.

Comparative Dataset

INTERPRETING YOUR RESULTS

This report reflects perceptions in your school as captured by the YouthTruth survey instrument. The dataset to which we compare you contains only schools that have participated in YouthTruth. Therefore, we consider this report to be an informative, though not comprehensive, source of data. The comparative data included in this report offers a helpful point of reference for interpreting feedback from family members in your school, but does not comprise a representative sample of U.S. elementary schools.

We encourage you to interpret this feedback in light of your own goals, strategies, and context, and to review it in conjunction with other data sources that you use to monitor your school's progress.

COMPARATIVE DATASET

YouthTruth's elementary school comparative dataset includes 569 schools, and the average response rate is 32% percent.

The number of schools in the table below may be slightly different than the number of schools in the comparative dataset because: 1) the comparative dataset includes international schools, and 2) schools are occasionally double counted in this table if they participated in YouthTruth once through their district and once through a network of which they are a part, or if they participated through two different networks.

Schools from the following districts and charters networks comprise the comparative dataset for this report:

Methodology

SURVEY ADMINISTRATION

Family members participated in the YouthTruth Family Survey during a multi-week survey window. The survey was administered online, with administration coordinated by school personnel.

REPORTING THRESHOLD

Throughout this report, we remove any results reflecting responses from fewer than five respondents in order to preserve respondent confidentiality. If fewer than five respondents of any given subgroup at your school respond to a particular question, the average rating of that particular subgroup for that question will not appear in your report. If fewer than five respondents of any given subgroup at your school respond to the entire survey, the average ratings of that particular subgroup will not appear separately for any questions, although they will contribute to your overall ratings.

ABSOLUTE VS. RELATIVE RATINGS

Throughout this report, you will see a number of references to the "typical" YouthTruth school. These guidelines describe our approach to characterizing schools' results relative to the "typical" school.

- **For likert questions (1-3 or 1-5 scale):** Results are described as "higher than typical" when they fall at or above the 60th percentile in the comparative dataset – that is, higher than 60 percent of other elementary schools that have participated in YouthTruth. Conversely, results are described as "lower than typical" when they falls below the 40th percentile – or, lower than 60 percent of other participating elementary schools.
- **For questions allowing multiple responses (e.g., Do any of the following make it hard for you to do your best in school? – Home life; extracurricular commitments; etc.):** Results are considered "higher than typical" when they are at least 8 percentage points higher than the results for the median school in the comparative dataset, and "lower than typical" when they are at least 8 percentage points lower than the median.
- **For categorical questions allowing only one response (e.g., Do you want to go to college? – Yes; No; Maybe; I'm not sure):** Results are considered "higher than typical" when they are at least 8 percentage points higher than the results for the average YouthTruth school, and "lower than typical" when they are at least 8 percentage points lower than the average.

SUBGROUP COMPARISONS

Throughout this report, you are able to disaggregate data based on subgroups of people with similar characteristics.

Results for likert questions (1-3 or 1-5 scale) with percentile charts are displayed from highest to lowest rating for categorical subgroups (gender, race, special education status, etc.), and are displayed in order for variables that are ordinal (grade, years at school, student-reported grades, etc.)

For questions allowing multiple responses (e.g., Do any of the following make it hard for you to do your best in school? – Home life; extracurricular commitments; etc.), which are displayed in bar charts, categorical subgroups (gender, race, special education status, etc.) are shown in order of highest to lowest proportion of the population. Ordinal subgroups (grade, years at school, student-reported grades, etc.) are shown in order.

For percent positive charts (showing the percent 4's and 5's), categorical subgroups (gender, race, special education status, etc.) are shown in order of highest to lowest proportion of the population. Ordinal subgroups (grade, years at school, student-reported grades, etc.) are shown in order.

COHORT COMPARISONS

To help make comparisons more contextually meaningful, you can toggle to compare your results to a subset of participants with similar characteristics. Groups that are similar to your school's characteristics are marked with an asterisk.

Most schools participate in the YouthTruth surveys alongside other schools within their local school district or network. When this is the case, schools can compare their results to those of other schools in their district or network. Reports also include a set of comparison groups that allow for comparisons across school-level indicators related to poverty, school size, school type, and geography. These groups include:

Cohort Name	Description	Number of schools
PA schools	Schools located in this state.	28
Charter schools	Publicly funded, independently managed schools established under the terms of a charter with a local or national authority.	39
High poverty schools	Greater than or equal to 70% of a district or school's students receiving free or reduced price lunch.	183
Large city schools	Schools located in an urbanized area and in a principal city with a population greater than or equal to 250,000.	74
Large size schools	Greater than or equal to 800 students.	2
PBL schools	Schools utilizing project-based-learning models as part of curriculum.	26
Rural schools	Schools not located in an urbanized area.	111
Small city schools	Schools located in an urbanized area and in a principal city with a population of less than 100,000.	55
Small size schools	Less than or equal to 200 students.	94

Cohort Name	Description	Number of schools
STEM schools	Schools utilizing a curriculum focusing primarily on science, technology, engineering, and math.	17
Suburban schools	Schools located in an urbanized area, but outside a principal city.	264

*Your school is in this cohort *(School Reports only)*.

The four geographic cohorts are defined based on collapsed categories using NCES locale codes. For more information on NCES methodology, please visit https://nces.ed.gov/programs/edge/docs/LOCALE_CLASSIFICATIONS.pdf.

Respondents are also asked a series of demographic questions, the responses from which are used to create subgroup comparisons that you can toggle throughout your report.

SUMMARY MEASURES

YouthTruth survey questions are grouped into summary measures, each of which captures data from statistically related questions. To identify these summary measures, YouthTruth uses factor analysis, a statistical tool that analyzes underlying patterns in the data.

In your report, subsections titled, for example, "Engagement Questions" include the survey questions that comprise the summary measure, or factor, describing Engagement. Subsections titled "Related Questions" contain survey questions that are thematically but not statistically related to the factor.
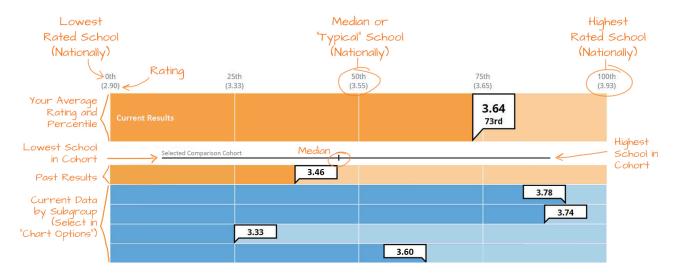

For the middle and high school Student surveys, certain summary measures were developed after the launch of the survey. Therefore the number of schools in the comparative dataset for those questions. For more information about the development of summary measures and the analytical techniques used, please refer to the YouthTruth Design and Methodology Report **here**.

Percent Positive Charts show the percentage of respondents that chose either a 4 or a 5. This chart type allows you to share data at a school/district level by maneuvering to the right hand side of the chart and clicking on any of the share icons.

Question	Your School - Sep 2020	Share
Discipline in this school is fair	55%	🐦 ⧉
My classmates want to do well in school	67%	🐦 ⧉
Adults from my school treat students with respect	80%	🐦 ⧉
Students from my school treat adults with respect	58%	🐦 ⧉

Response Distribution Charts show the proportion of respondents who chose each response option for questions on a scale of 1 to 5, where 1 is the most negative and 5 is the most positive response (known as a likert question). A variety of different response distributions can result in the same average rating, so this breakdown can help provide additional context.

For example, two very different response distributions could both have an average rating of '3'.

In sample question 1 below, the majority of respondents (70%) feel neutral about the question, with a handful of respondents having a more negative or more positive experience.

Sample Question 1	10%	70%	10%	

In sample question 2 below, there is a much greater variation in respondent experience.

Sample Question 2	20%	20%	20%	20%	20%

Average Ratings bar charts, Percent Positives, and Response Distributions are repeated twice per survey item. Once with an overall result displaying the school's/district's scores with the ability to compare results to other schools in a same cohort. They are also shown as subgroup charts, where data can be disaggregated by demographics.
